

Quality and Standards at Saudia Airlines

Quality & Standards Project – Under supervision of Dr. Deena Eiddah Al-Ghamdi

Team Members:

- Maysam Abduljalil
- Maryam Alturkistany
- Sarah Alsolamy
- Fatima Al-attas
- Gaidaa Sako
- Thuraya Barnawi

Abstract

This project improves the quality and software systems at Saudia Airlines to reduce frequent flight delays. It applies international standards (ISO, IATA, GACA) to enhance efficiency, safety, and customer satisfaction, supporting Vision 2030.

Objectives

- Improve software quality and management.
- Apply global standards (ISO, IATA, GACA).
- Reduce flight delays.
- Improve customer and employee experience.
- Support continuous improvement.

Quality

QUALITY IN AVIATION =
SAFETY + RELIABILITY + CUSTOMER SATISFACTION

Standards

Main standards used:

- ISO 9001 → Quality management
- ISO 27001 → Information security
- IATA / GACA → Safety & operations
- GDPR → Data privacy
- WCAG → Website accessibility

Implementation Plan

Plan & analyze problems

Apply ISO & IATA standards

Improve flight scheduling

Ensure data protection & accessibility

Monitor performance & feedback

Conclusion

Applying quality and standards helps Saudia Airlines reduce delays, improve service, and meet Vision 2030 goals.

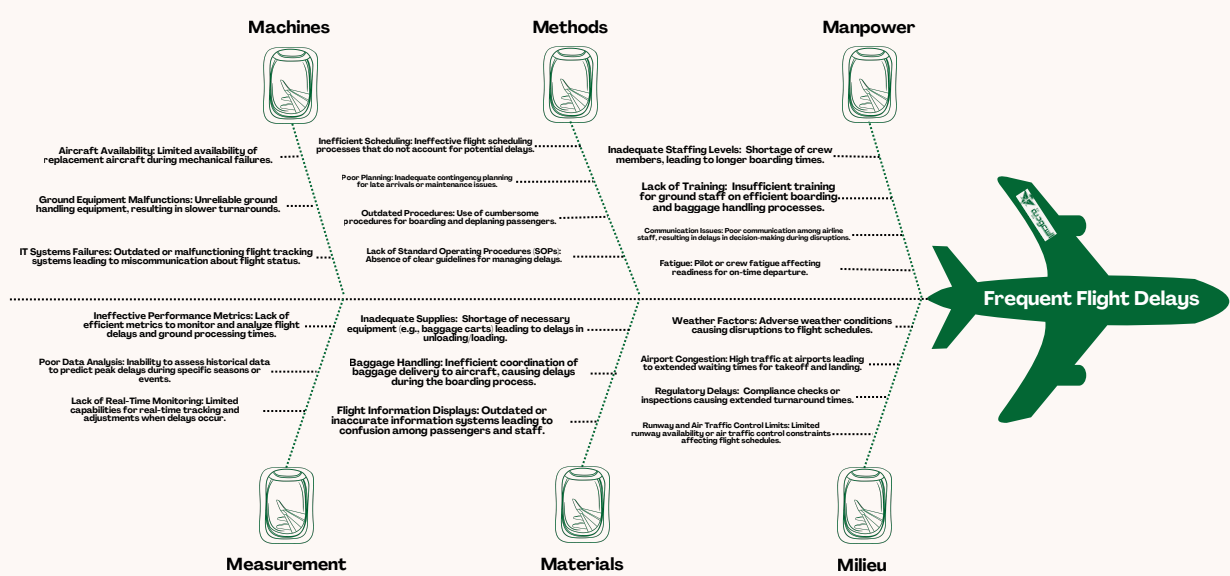

السعودية

Main Problem (Fishbone Summary)

Reasons for Flight Delays:

- 🧑✈️ Manpower: not enough staff, lack of training.
- ⚙️ Machines: old systems or equipment.
- 📅 Methods: poor planning or scheduling.
- 📦 Materials: not enough supplies or baggage delays.
- 📊 Measurement: weak tracking and data.
- 🌤️ Milieu: weather, traffic, regulations.

Key Quality Indicators

- On-time flights
- Passenger satisfaction
- System uptime
- Maintenance completion rate
- Data security
